Overview

A company may run a number of projects at a time, and requires input from a number of individuals, or teams for a multi level development plan, whereby a good project management system is needed.

Megawebsource Project Management System plays a distinctive part in ensuring reliable, robust and high quality web applications for customers. The reliability and robustness of a web based project management system has also been set as the structure of the current thesis. Finally, a web based project management system has been developed, which highly meets the standards and requirements set by the company.

Why choose us?

Collaborate with team members & clients

Documents sharing on the go

Real time Graphs and Charts

Bug Tracker to improve your project

100% Responsive Works on any device

Dedicated support by professionals

Features

Project Management

Get your projects organized! Assign a project to your collaborators and let your clients see the progress of their work on their Dashboard.

Project Tasks with Timers

Track your Tasks just as you would track your projects time. You can also save common tasks and add them to your projects instantly.

Project Cost Calculator

Know how much your project is worth by setting an hourly rate and it'll calculate the cost of the project based on hours you've worked.

Project Notes

Store FTP Passwords, Usernames etc. in your projects Notes Section.

Features

Bug Tracker

What gets tracked gets improved! That means carefully tracking what needs fixing, fixing it and verifying that the fixes work.

Project Timer

Track every project's time and view the time spent on a project in a timesheet.

Invoicing System

Freelancer Office comes with Invoicing System so you can receive Payments via Paypal and get your database updated automatically.

Create Estimates

Create and send detailed estimates and get to know the estimate status anytime. Once an Estimate is Accepted, you can Instantly convert them into Invoices.

Features

Client Portal

Every client can login and view their projects and Pay Invoices. You may choose to allow Client registration or disable it.

Project Comments/Files

Let your clients know what is happening using the Projects Comments area. You can also share files with descriptions across the system with your clients with email notifications.

Item Templates

Save your commonly used Invoice Items and when you need them, use the Quick Add functionality to add them to your Invoice.

100% Responsive Design

Irrespective with the device you use, Megawebsource Project Management System works on all devices such as Desktop, Laptop, Tablet, or any Smart Phone.

Features

Client Portal

Every client can login and view their projects and Pay Invoices. You may choose to allow Client registration or disable it.

Project Comments/Files
